NEW HANDPIECE LUBRICANT FEATURES PATENT PENDING METERED-DOSE SYSTEM

CARLSBAD, CA-- Hayes Handpiece Company announces the availability of Hayes OneStep™ handpiece lubricant with the patent pending Metered-Dose system. The Metered-Dose system controls the amount of lubricant that is dispensed during lubrication, eliminating the mess and cutting the cost of handpiece maintenance to just one penny per use.

“The Hayes Franchise Partners pride themselves on their in-depth knowledge of dental handpieces. It is this knowledge that enabled Hayes to develop an aerosol lubricant with a delivery system that expels just the right amount of lubricant to properly clean and lubricate all necessary components of a handpiece,” explains John Hayes, founder of Hayes Handpiece Company.

Hayes OneStep™ has also received top rating in the industry-standard 4-ball wear test. This test, which measures bearing scarring within the handpiece turbine, indicates that Hayes OneStep™ performs better than other lubricants on the market.

Hayes provides a variety of adapters for its metered-dose aerosol for lubricating any type of handpiece. Hayes OneStep™ is also available in dropper bottles, standard aerosol cans and 500-ml bottles for the Adec Assistina.

To purchase Hayes OneStep™ lubricant, please contact your local Hayes office in the United States or Canada.

For international distribution inquiries, please contact Joe Hayes, CEO of Hayes Handpiece Company.

Hayes Handpiece Company is a franchise network of 85 individually owned and operated handpiece repair centers in the US, Canada, and the UK. Founded in 1989, Hayes focuses on providing the highest quality local handpiece repair service and sales to dental practitioners and laboratories. Our corporate headquarters are located in Carlsbad, California.
